What choices should we make when planning for the future of our region?

Forecasts by the Houston-Galveston Area Council predict that by the year 2040, our region will:

- Grow by 3.5 million people
- Gain 1.9 million jobs
- Become a "majority minority" population

For this survey, please consider three possible futures for the region. Each represents one of the top three areas residents indicated were important during a survey conducted in early 2012 - **Less Time on the Road**, **Greener Region**, **Competitive Workforce**. As a baseline when thinking about these three alternative futures, please consider the **Current Course**, or what the future may look like if we don't make any changes to our current growth, environmental and educational trends.

LEARN MORE

2040 Current Course

- Existing trends continue
- No major policy changes
- Most of growth occurs outside of existing towns and cities
- Traffic congestion increases
- Large amount of natural areas lost to development
- Education concerns not addressed, leading to a less competitive workforce

LEARN MORE

2040 Alternative Future: Less Time on the Road

- Reduction in travel times, costs
- Most of growth occurs in existing places
- More jobs and housing located closer together
- Some new housing is smaller sized, in walkable areas
- More investment in sidewalks, bikeways, public transportation
- Better air quality

LEARN MORE

2040 Alternative Future: Greener Region

- Air and water quality improved
- Development reduced in flood and storm surge vulnerable areas
- Best natural areas preserved
- New businesses, workers, tourists attracted by natural areas
- Greener practices adopted by local governments

LEARN MORE

2040 Alternative Future: Competitive Workforce

- Increase in education attainment of residents
- Community factors, such as poverty and crime, addressed
- Highly skilled workforce
- Competitive economic region
- Good jobs and job training opportunities

Current Course

In this alternative, most of the growth occurs outside existing towns and cities. This helps keep housing prices down, but does not create long-term value for most homeowners, as older cities, suburbs and towns decline with the continuous movement of people to newer communities.

The distance between jobs, housing and activities also continues to increase, meaning that driving remains the option for almost all the trips people make. Despite major upgrades in roads and freeways, traffic congestion keeps increasing, as the number of new drivers grows faster than the funds available for road expansion and maintenance. Public transportation

[\(Terms and Conditions\)](#)

In this alternative, most of growth takes place in cities and towns—particularly in activity centers and other areas where housing, jobs and activities are located closer together. New development strengthens the local tax base in these places, enabling them to improve maintenance and services without raising taxes.

Transportation strategies are less focused on widening freeways and major roads and more on public transportation—buses, light rail and commuter rail—and improvements to sidewalks and bikeways. Local plans, codes and incentives are

 EXISTING COMMUNITIES

This alternative promotes more growth in existing communities where infrastructure and services already exist.

53% of the population growth occurs in existing communities

2040
CURRENT COURSE

76% of the population growth occurs in existing communities

2040
LESS TIME ON THE ROAD ALTERNATIVE

Rural

Traditional downtowns can accommodate residential above retail while maintaining their character.

Suburban

New or redeveloping suburban areas can create vibrant districts with 3-5 story buildings mixing housing and retail.

Urban

Urban areas can be both job and housing centers, accommodating growth while creating areas to live, work, learn and play.

Greener Region

In this alternative, the region has made a major effort to preserve its best natural areas—wetlands, forests, prairies and shorelines—and to reduce air and water pollution. Suburban growth trends continue, with the exception that development is greatly reduced in those areas most vulnerable to flooding and hurricane storm surge—which are also some of the region's best wildlife habitat.

Public and private funds are used to preserve many prime natural areas and provide access to residents and visitors for outdoor recreation. These efforts increase the quality of life for residents and enhance the region's ability to recruit new business and skilled workers and to attract tourists.

[\(Terms and Conditions\)](#)

This alternative preserves high-quality natural areas.

-  HIGH-QUALITY NATURAL AREAS
-  EXISTING COMMUNITIES

Competitive Workforce

In this alternative, the region makes a major effort to increase the educational achievement of its residents. Improving high school graduation rates, particularly in low-income communities where dropout rates are high, becomes a priority. The focus is not only on improving schools, but also addressing community factors such as poverty, crime, and substandard housing that can negatively affect educational outcomes.

These efforts are coordinated with increased educational enrichment, including pre-school, after-school tutoring and mentoring, and English-language skills programs. Additionally, improved opportunities for vocational training, adult education, and counseling and support for small business owners are provided throughout the region.

Alternatives Outreach

Survey Distribution Methods:

- On-line
- E-blasts
- Targeted outreach to business, professional, and community groups
- Community meetings in underrepresented areas
- iPad surveys
- Kiosks

Geographic Summary

Total Survey Responses: 6,253

Demographic Summary

Demographic Summary

Income

Education Level

Less Time on the Road

From where you live, how difficult/easy is it for you to get to the places you want to go?

Do you think it will be easier or more difficult in the year 2040 for people to reach the places they want to go than it is today?

Less Time on the Road

From where you live, how much time does it usually take for you to reach the following destinations?

From where you live, which of the following could you reach in 10 minutes or less comfortably by bicycling or walking?

Less Time on the Road

If you could live anywhere in the region, which of the following would be the most important factor in your decision?

As our region continues to grow, which of the following would you like to see in the area where you live?

Less Time on the Road

What is the best way to accommodate future growth?

What would you support to make this alternative a reality?

Less Time on the Road

How the region would spend \$100 to improve the region's transportation system

Less Time on the Road

Summary:

- People don't think the situation is today bad today but concerned about future
- Support for planning and coordination
- High allocation of funding to planning to alternative modes compared to current

Greener Region

How do you think the quality of the region's air, water and natural areas will be in the year 2040 compared to today?

As we grow, steps should be taken to preserve our region's wetlands, forests, prairies and shorelines.

95% AGREE

Greener Region

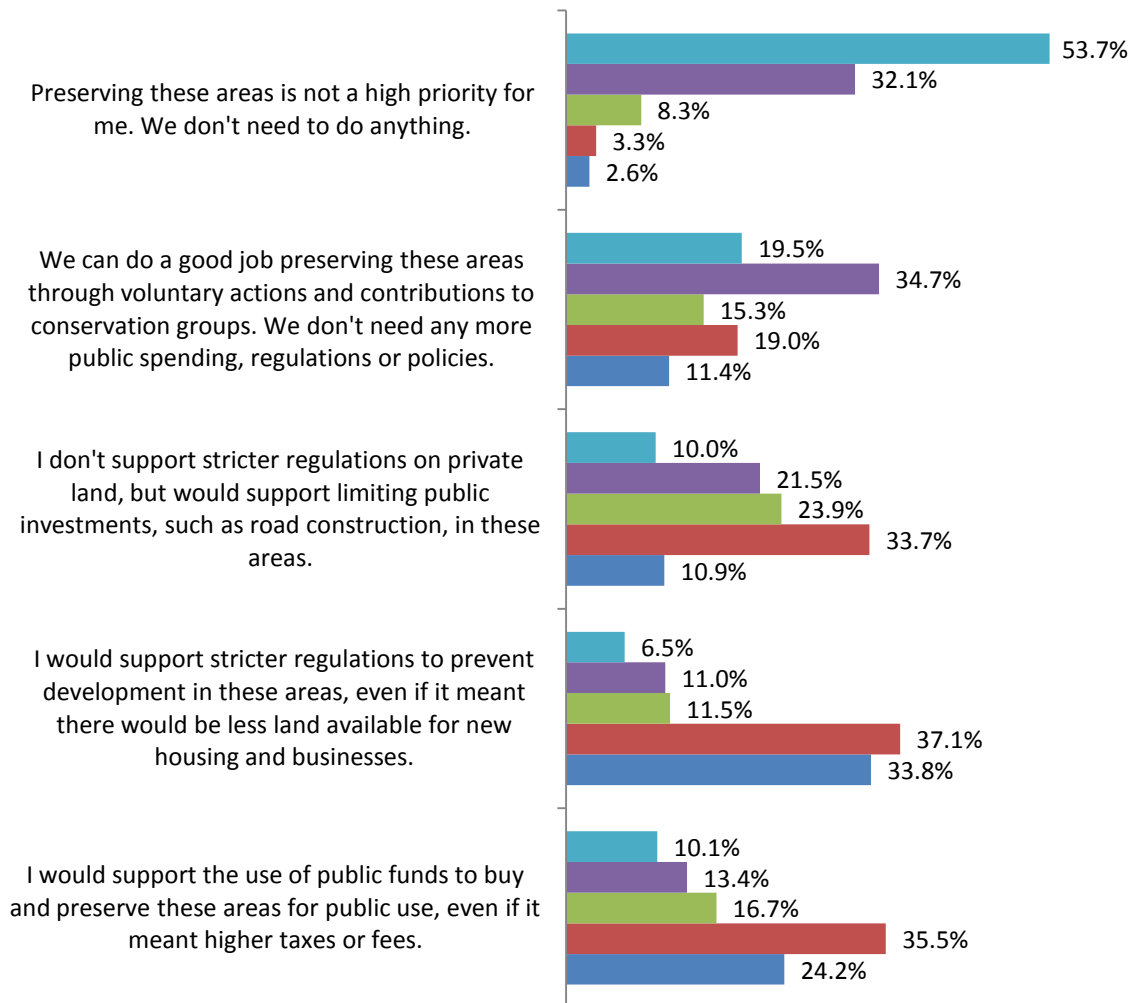

What is the most important reason to step up efforts to preserve our region's wetlands, forests and prairies?

Greener Region

Rate your level of agreement with the following statements about strategies for preserving the region's wetlands, forests, prairies and shorelines.

- Strongly disagree
- Disagree
- Neutral
- Agree
- Strongly agree

Greener Region

Rate your level of agreement with the following strategies for cleaning up our region's air and water.

- Strongly disagree
- Disagree
- Neutral
- Agree
- Strongly agree

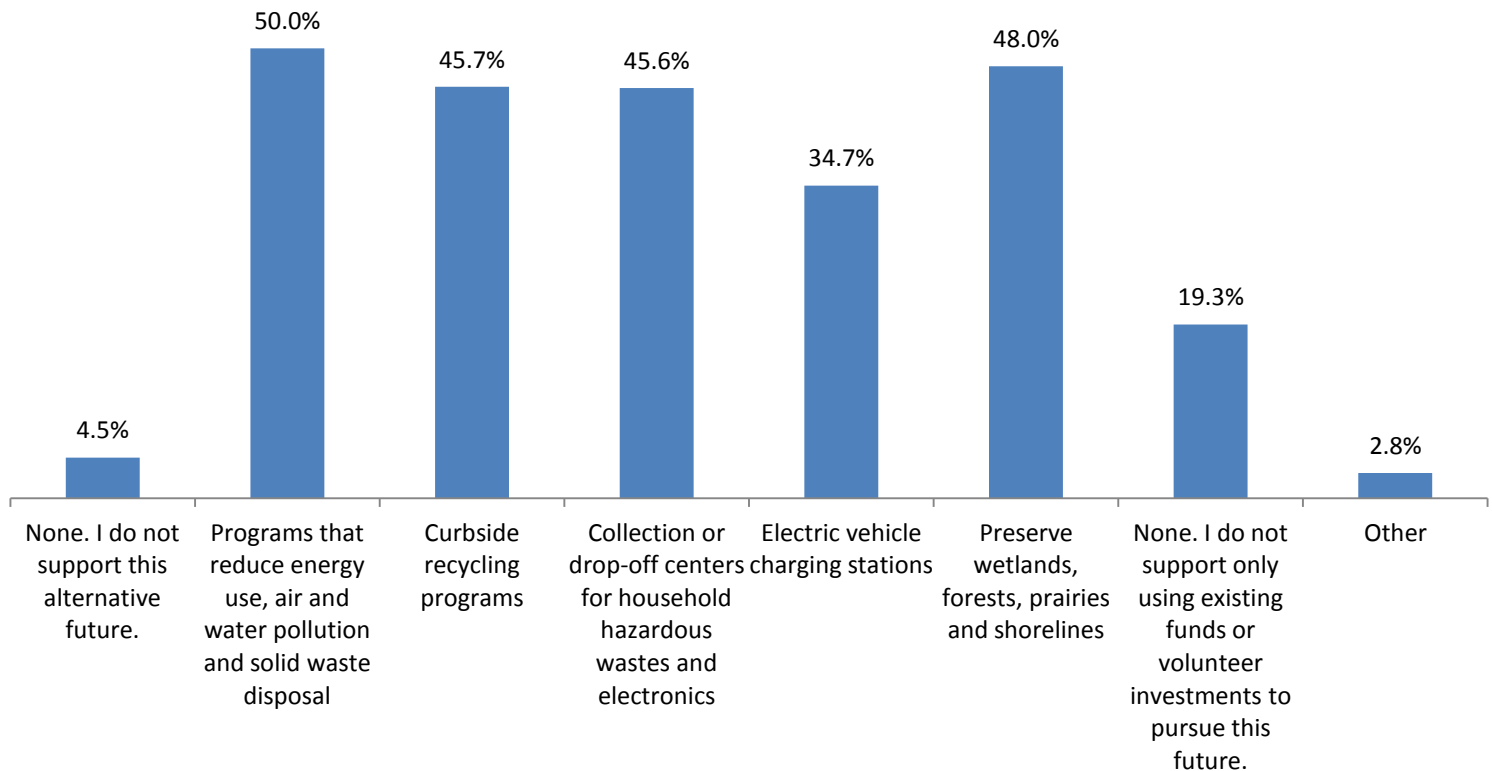

Greener Region

What would you support to make this alternative a reality even if it meant higher taxes or fees?

Greener Region

What would you support to make this alternative a reality using existing funds or through volunteer investments?

Greener Region

How the region would spend \$100 to improve the environment

- \$10.53 Education about the environment
- \$14.55 Weatherizing homes to improve energy efficiency
- \$15.42 Air quality initiatives (telecommuting, engine replacement, etc.)
- \$17.25 Water quality planning
- \$17.30 Expanding recycling programs and centers
- \$24.96 Conserving wetlands, prairies, forests (purchasing land)

Greener Region

Summary

- People realize the value of preserving air, water and natural resources and that current conditions now will be a lot worse in 2040 if we don't do something about it.
- People support public and private efforts to conserve, improve, and protect our natural resources but don't believe this can be achieved with an entirely voluntary approach.

Competitive Workforce

I think the opportunities for getting a good education in my community are:

Competitive Workforce

Are there factors in your community besides the quality of schools that make it a poor environment for getting a good education?

Which factors in your community (besides the quality of the schools) make it a poor environment for getting a good education?

Competitive Workforce

Of the following services not currently available in your community, which would be your top priority to add?

Competitive Workforce

Do you have an interest in learning a new skill that will improve your job prospects and earning potential?

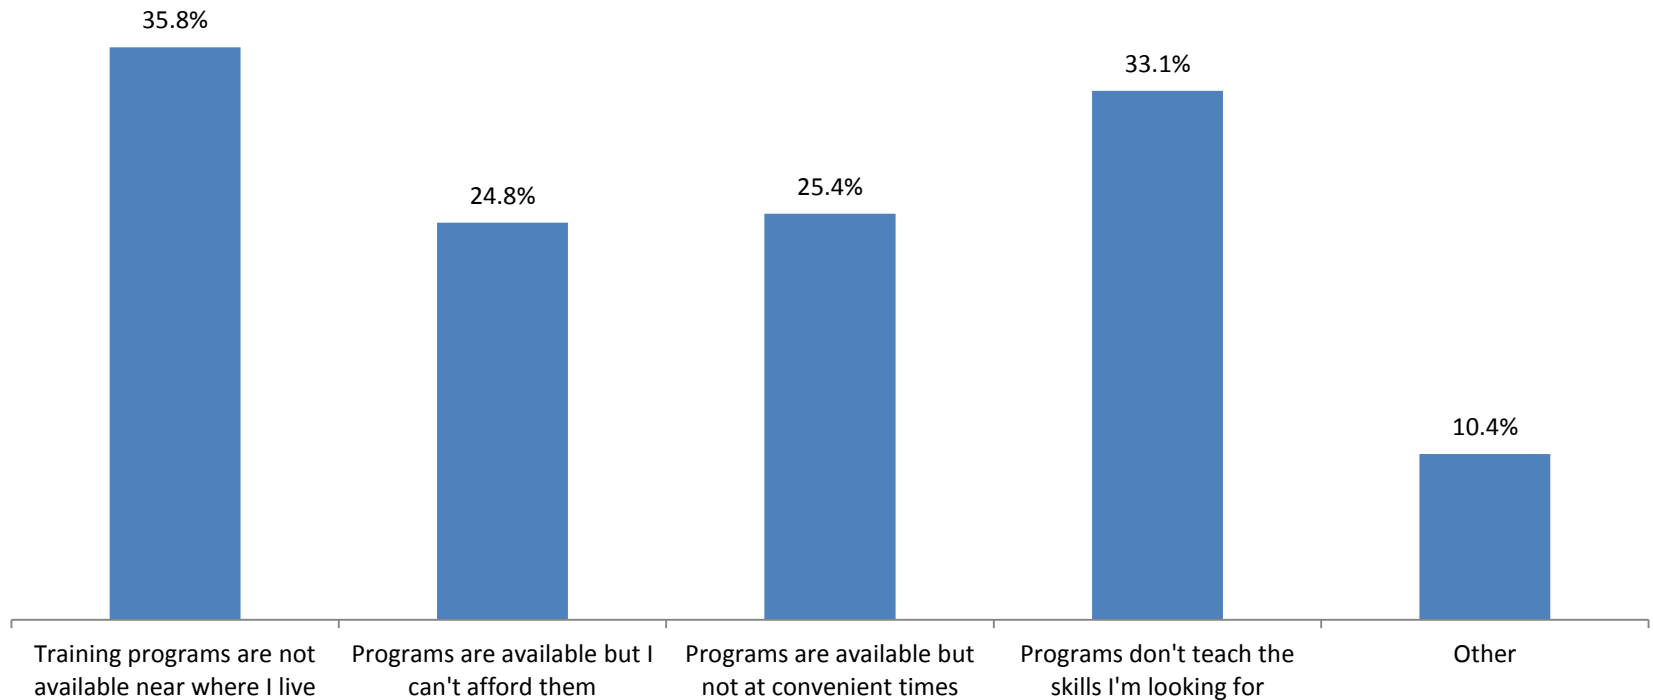

How would you rate the opportunities for learning new job skills where you live?

Competitive Workforce

Why do you think your opportunities for learning new job skills are fair or poor?

Competitive Workforce

Do you currently have or have you considered starting a small business?

How would you rate the opportunities available where you live to get training and support to make your business successful?

Competitive Workforce

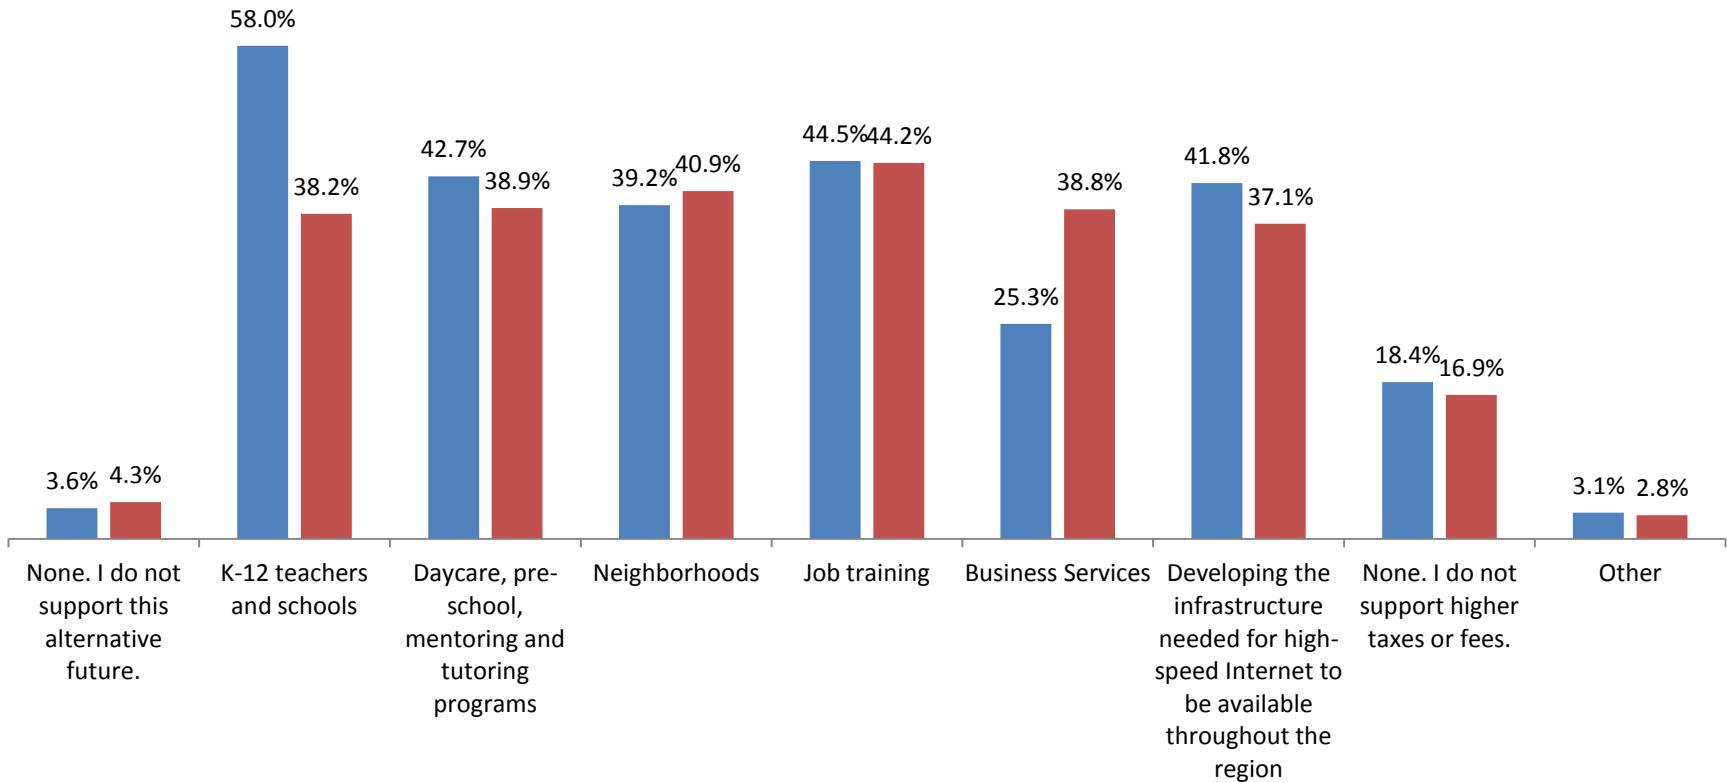

What improvements would you like to see in the opportunities available to get training and support to make your small business successful?

Competitive Workforce

■ What would you support, even if it means paying higher taxes or fees?

■ What would you support, only if it was accomplished using existing funds or through volunteer investments?

Competitive Workforce

How the region would spend \$100 to improve the region's community factors that impact education and training opportunities?

- \$12.45 Improving housing conditions
- \$27.98 Improving safety/crime
- \$15.27 Libraries and community centers
- \$16.00 Educational enrichment programs
- \$9.94 Improving Internet access
- \$18.36 Improving transportation access

Competitive Workforce

- Summary
 - Most report satisfaction with educational and training opportunities but there are race, income and geographic area differences.
 - Crime and safety are major factors that contribute to poor environments for getting a good education.
 - A few of the top things to address to make a more competitive workforce include:
 - Improving K-12 teachers and schools
 - Access to training programs

Bringing it all Together

- Survey results provide a narrative for how the region can move forward
- Translating results into preliminary strategies
- Differences in how different parts of the region and different demographic segments answered
- How these differences can inform strategies
